# Bull is owned by a customer in Pagosa Springs, CO and is being sold to prevent breeding of his daughters. Bull is a real sweetheart, and highly proven for calving ease and fertility.

Weaning \$ are calculated by the Angus Assoc.: Relative extra values of calves if sold at weaning.

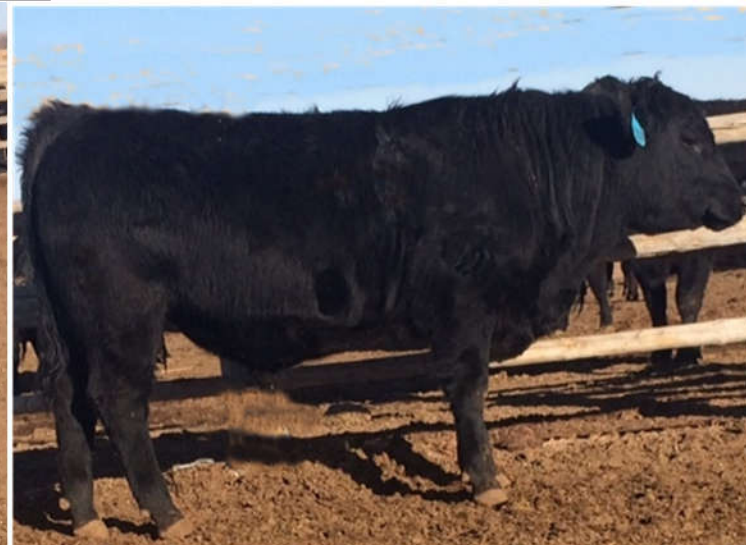

Calving Ease- Higher CED is better  
 \*\*\*\* Exceptional ease  
 \*\*\* Suitable for heifers  
 \*\* Well-grown heifers only  
 \* Best not used for heifers

Heifer bulls-  
 Calving Ease scores predict better than BW EPDs .

PAP scores – if grazing above 8000 feet, it is best if PAP scores are below 45

7021

7018

**Also selling: 15 premium 875-lb registered Angus open replacement heifers at \$1200 each and top-end first-calf heifer pairs with January and February calves at \$2500.**

### **About Our Program**

- We do not creep-feed calves. Period!
- We harvest low-cost grass.
- We select for high weaning weight, low to moderate birth weight, and moderate milk (too much milk requires too much feed to breed back early).
- We performance test the bulls in standardized, high-roughage feeding trials and cull again.
- We use embryo transfer to get more calves from our better cows and add new genetics to our herd.
- Angus carcasses are tender, readily grade choice, and Angus-sired feeder calves bring a 3-5¢/lb premium.
- A load of herdmate steers to previous year's bulls sold on the grid; 39 of 40 qualified for premium carcasses, and earned an average \$70 premium over sales on a live weight basis!
- Bulls have been selected on pedigree, conformation, weaning weight, yearling weight, and semen quality, and pedigrees are clean for carrier status of curly calf, fawn calf, DD, and hydrocephalus.
- All bulls genomic tested; EPDs are genomically enhanced. All calves sired by these bulls will be polled; all bulls are PAP tested.

### **About EPDs (expected progeny differences)**

- EPDs are no substitute for evaluation of animals for structural soundness or for the reputation of the seller.
- However, EPDs are the best scientific measure of how an animal's progeny will perform, and often, the single most useful tool for improving cattle. EPDs incorporate information on adjusted weights and are up to 9 times more accurate than ratios.

National Angus EPDs (lbs) (Non-Parent Bulls)		Birth Weight	Calving Ease	Weaning Weight	Maternal Milk	Yearling Weight	\$ Weaned Calves
<b>Top</b>	10%	-0.8	12	65	30	114	64
	30%	0.5	9	56	26	97	53
<b>Average</b>	50%	-1.6	6	51	24	89	46
	70%	2.2	4	45	21	79	40
<b>Bottom</b>	90%	3.5	0	36	18	63	29

Note: Even a 5 lb EPD Angus birth weight produces a smaller calf relative to the average of nearly any other beef breed.

Terms and Condition We will follow the guidelines of the American Angus Association for terms and conditions of sales. **All animals are guaranteed** to be structurally sound and healthy at the time of the sale, and are guaranteed breeders.

- Free delivery within 100 miles
- 5 % discount with purchase of 3 or more head
- First come, first served

### **Breeding Season Guarantee**

If any bull should become injured or is otherwise unable to breed cattle prior to September 1, 2018, we will exchange the bull for a similar one. Should a bull die before September 1, 2018, we will give a \$500 credit for purchase of another bull from us, if purchased before April 1, 2019. There are no guarantees for events after September 1, 2018.
